New York, Dec. 3 .- Succeeding the commotion in the stock market yester-day the course of prices today followed U. S. Rubber lessening fluctuations. After the violent raily of yesterday afternoon it was to be expected that there should be a renewed dip this morning. There were to be expected that there should be a renewed dip this morning. There were several normal causes to be looked for to produce this result. There were the renewed dip this morning. There were several normal causes to be looked for to produce this result. There were several normal causes to be looked for to produce this result. There were the holdings of room traders secured on the decline yesterday on which quick profits would inevitably be sought on the first considerable rally. There were some sales to be expected of holdings that had been accumulated with the purpose of supporting the market in its period of greatest weakness. As London was a keen buyer here on the break there was some notable profittaking from that center on the high level which helped to beat back prices this morning. In a demoralized market like that of yesterday there are speculative holders strong enough to save their holdings from undue sacrifice at the moment of greatest weakness, who are still under pressure to lighten their lead on the first rally after so violent a break.

The recovery in prices has the effect also of driving out of the market the hard-headed "bargain hunters" who appear in Wall street only in periods of boom and inflation to sell. There was also the natural uneasiness as to the depth of the wounds inflicted yesterday and the possible consequences. All of these were contributing causes to the nervous break in prices in today's early market in which the losses ran from 1 to 2½ points in an extended list of important properties.

The recovery promptly set in as soon

The recovery promptly set in as soon as it was announced that all sheets had gone through the stock exchange clearing house successfully, that being equivalent to an announcement that all financial embarrassments had been avoided. There was hesitation and dullness when the recovery had reacned about last night's closing level again. But the light pressure to sell at the recovered level of prices encouraged speculative sentiment and induced so much confidence that prices were pushed upward again aggressively with ome evidence of a resumption of operations by speculative pools, in spite of vesterday's severe lesson.

Money proved to be in plentiful sup-ply and the rate for call loans fell back easily. The severe discrimination against some securities as collateral which was a factor in breaking the market yesterday, was somewhat relaxed. The announcement of the engagement of \$500,000 gold in Paris for importation had an effect on sentiment although the curious cross currents of the present gold movement are seen to be quite apart from the condition of promin the exchange markets. The ease of the call money market was accepted as a better index of the extent of the liquidation yesterday than will be given by tomorrow's bank statement which will probably reflect the loss of cash due to gold exports and transfers to the insterior through the sub-treasury and only slightly the loan contraction owing to the operation of the average system of computation. The Missouri Pacific bond sales and the establishment of dividends on Southern Pacific preferred were helps toward reviving speculative spirits.

FAIRLY GOOD.

New York, Dec. 9 .- Bradstreet's tomorrow will say:

While distribution displays more irregularity, manufacturing industries, with few exceptions, continue very active. Wholesale distribution, as usual

at this season, tends to quietness, though in excess of a year ago. Western jobbers fail to report an active reorder movement in staples, but holiday trade is progressing favorably and promises with favorable weather to reach a large total. Holiday specialties in groceries, dry goods and fancy articles have had a large sale, and the hardware trade east and west is in ex-cellent shape. The winter wheat situation is still not entirely clear. The feeling is one of optimism in trade. The country seems to look forward to 1905 with confidence, and some lines report a full quarter's trade already practically booked.

Heavy Railway Traffic.

Railway earnings returns point to very heavy traffic proceeding. Gross teturns for November show an aggre-gate gain of 10½ per cent over last year. Clearings are of enormous vol-ume and compare favorably not only with last year's small totals but with the large transactions of previous years, and only 1.5 per cent below the record week ending May 19, 1901. Among the industries, iron and steel

and their allied branches show most confidence. Some reaction is shown in the other metals after recent advances, but copper is quite steady, while tin is

Wool is quiet but firmly held, with stocks light and manufacturers not as yet fully covered for the season. The hide trade shows little change.

List of Failures. Business failures in the United States for the week ending Dec. 8 number 231, against 184 last week, 241 in the like week of 1903, 247 in 1902, 233 in 1901 and 247 in 1900.

In Canada failures for the week number 23, as against 20 last week and 7 in this week a year ago. Wheat, including flour, exports for he week ending Dec. 8 aggregate 1,139,-

row will say: Wall street's severe reaction was not due to any setback in the commercial world, all measures of legitimate trade showing wholesome progress, and confi-dence in the future is unshaken. Railway dence in the future is unshaken. Railway earnings in November averaged 9.2 per cent greater than in the same month of 1993, and the distribution of merchandise is sufficiently heavy to produce freight blockades at several points. Manufacturing plants report increased output in almost every instance except inadequate water supply provides a temporary interruption. Seasonable weather has stimulated retail trade in wearing apparel, and holiday goods are in great demand. Foreign commerce at this port for the last week shows a gain of \$2,029,971 in exports as compared with the same week last at 41%45.

London Stock Market. London. Dec. 9.—The effects of yester-day's fall in the stock market were evidenced at the opening of the stock exchange today by general nervousness, Americans, however, opened firm at about parity, subsequently became a little easier but quickly recovered and at 2:45 p. m. to duckly recovered and at 2.39 p. m. vere again above parity.

London financiers who were seen by epresentatives of the Associated Press renerally expressed the opinion that the New York market had been too heavy and bety verterally or private warms.

New York market had been too heavy and that yesterday's crumbling of prices was considered inevitable sooner or later.

Although the suddenness of the fall surprised the market here there was no panic; in fact, there was some buying at low prices. The London financiers anticipate that the recovery will be gradually. They do not believe that stocks will reach their former prices nor develop reach their former prices nor dey much staying power for some time.
